VALAVAN ACADEMY

The AI-Powered Full Stack Creative Mastery is a complete career-focused training designed to help beginners become professional digital creators by mastering the most in-demand creative skills used in today's industry.

In this program, students learn **Graphic Design, Branding, Social Media Design, Thumbnail Creation, Video Editing, AI Tools, and WordPress Website Design** through real-world projects and portfolio-based assignments. Instead of learning only software tools, students follow a structured step-by-step journey from design fundamentals to client-ready skill development.

Throughout the program, learners create posters, logos, brand identity kits, reels, long-form videos, podcasts, business websites, landing pages, and AI-assisted creative workflows that prepare them for freelancing, jobs, or independent creator careers.

By the end of the program, students graduate with a strong portfolio, practical experience, and a clear roadmap to start earning as a **AI-Powered Full Stack Creative Master.**
